ASTRILL VPN · INDEPENDENT GUIDE

Astrill Vpn for iOS: setup guide

iPhone and iPad.

Before you start

1. An active Astrill account and your login email and password.
2. Uninstall or disconnect any other VPN app on this device.
3. About ten minutes and a working internet connection.

Install

1. On your iPhone or iPad, open the App Store and search for Astrill.
2. Check the publisher name on the App Store listing, then install.
3. Open the app and tap Allow when iOS asks to add VPN configurations. Confirm with Face ID, Touch ID or passcode.

Connect

1. Sign in and connect to a nearby server.
2. Look for the VPN badge in the status bar or Control Center.
3. Settings > VPN shows the profile status if you need to check it.

Verify the connection

1. Check your IP address on a lookup site. It should show the VPN server location.
2. Run a DNS leak test. DNS servers should not belong to your home internet provider.
3. Turn on the kill switch or connection guard option if your app offers one.

Get the genuine Astrill Vpn app from our download center: https://astrillvpn.app/download . This guide contains no software. It was written by https://astrillvpn.app, an independent website that is not affiliated with, owned by or endorsed by Astrill. App screens and options can change between versions. Free for personal use.
